

Up goes typing production ---- Down go typing costs

Here is a typing sample from the **REMINGTON RAND**

A

☐ Electric DeLuxe Typewriter ☐ KMC Typewriter

☐ Quiet KMC DeLuxe Typewriter ☐ Noiseless Typewriter

NOW...FOR LETTERS OF DISTINCTION...

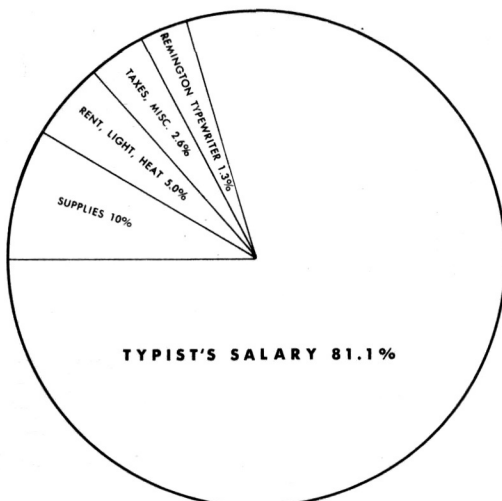

...a new, exclusive typewriter type face of distinction!

The new Remington Rand Type, in which this letter is written, has a new vertical spacing of 5.4 lines to the inch. Leading type designers were given the assignment of creating a type face that would have maximum legibility, and, in developing Remington Rand Type, they clearly accomplished their objective. At the same time, they gave this new type a character all its own.

As a result, this exclusive Remington Rand Type is ideal for executive correspondence as well as for general typing requirements. Widely accepted by business and professional men the country over, this type face was first introduced on the new Remington Electric DeLuxe Typewriter. It is now also available on the Quiet Remington DeLuxe KMC Typewriter.

For your review, we are showing below the numerals found on a keyboard of Remington Rand Type:

1234567890

How to cut office costs with new Remington Rand Typewriters

The cost of any new Remington Typewriter is less than 2.2% of your annual Typing Station investment of \$2500*, as shown in the chart at the left. Your typing production can be increased 10% and more so that you get maximum return on this major investment.
